SUMMARY

M. Tech (Computational & Data Science) student studying at Indian Institute of Science, Bengaluru. My work focuses on Databases and Query Optimization.

EDUCATION

Indian Institute of Science <i>Master of Technology - Computational & Data Science</i>	Bengaluru, Karnataka <i>July 2025 – June 2027</i>
University of Mysore <i>Master of Computer Applications</i>	Mysore, Karnataka <i>February 2023 – May 2025</i>
Curtin University <i>Bachelor of Technology - Computer Systems & Networking</i>	Perth, Western Australia <i>February 2020 – January 2023</i>

EXPERIENCE

Technical Content Writer – Wrote web articles on various Java libraries, including Spring Boot and Hibernate.	April 2023 – August 2023 <i>Freelance</i>
DevOps Intern <i>Invantest Sdn. Bhd.</i> – Automated installation of application using automation software such as Ansible. – Worked with shell scripting and task scheduling in Linux CLI-based systems. – Hosted a self-maintained instance of GitLab. – Hosted an instance of Ansible Tower (Ansible AWX). – Worked with Docker and Kubernetes.	November 2021 – February 2022 <i>Penang, Malaysia</i>
Kinsajasa Sdn. Bhd. – Learnt Visual Basic for Excel (VBA). – Programmed a Microsoft Excel Workbook using macros to make it into an interactive database for recording status of company's equipment.	December 2020 – February 2021 <i>Malaysia</i>

PROJECTS

Query Plan Equivalence using LLM View Code – Developed a Java-based program to semantically equate two query plans using Large Language Models (LLMs). – Completed as part of the E0261 course project.
QPostgres View Code – Modified PostgreSQL to support the Q-Error histogram, as developed by Moerkotte et. al.
PG_Pyramid View Code – Created a pyramid indexing extension for PostgreSQL based on the paper by Berchtold et. al.
LLM Training Pipeline – Developed a Python-based program using Apache Spark for preprocessing and DeepSpeed for distributed training of Large Language Models. – Completed as part of the DS256 course project.
Parallelised K-Means Clustering View Code – Implemented parallelised K-Means clustering using OpenMP. – Completed as part of the DS221 course project.
Parallel Matrix-Vector Multiplication View Code – Implemented parallel matrix-vector multiplication using MPI. – Completed as part of the DS221 course project.

EXTRACURRICULAR ACTIVITIES

Lead Volunteer, ACM SIGMOD/PODS 2026 | [*Website*](#)

- Served as the lead volunteer for the ACM SIGMOD/PODS 2026 conference.

IISc Calendar 2026 Designer | [*LinkedIn*](#)

- Designed the official Institution's Innovation Council (IIC) calendar for the Indian Institute of Science for the year 2026.

TECHNICAL SKILLS

Languages: C/C++, Java, Python, HTML/CSS, SQL

Libraries & Frameworks: Numpy, Pandas, Matplotlib, Apache Spark, DeepSpeed, OpenMP, MPI

Developer Tools: Microsoft Visual Studio, Jupyter Notebooks, Pycharm, Postman, Git/Github

IT Constructs: Operating Systems, Data Structures and Algorithms, Database Management Systems (PostgreSQL)

All Mainframe Technologies: COBOL, CICS, DB2, JCL, Easytrieve, Enndevor
